

### FOR IMMEDIATE RELEASE

## Data#3 expects significant upgrade in first half result

**November, 5, 2010, Brisbane, Australia:** Projecting a first half NPBT in the range of \$10M to \$11M, an increase of approximately 50 to 60%

BRISBANE, Friday 5th November 2010. The Board of Directors of Data#3 Limited (ASX:DTL) today announced that the company is on track to significantly improve its first half financial performance over the outstanding FY09/10 result.

Chairman Richard Anderson indicated that while the global situation remained uncertain domestic economic conditions were improving. "We are seeing increased levels of investment by our customers but continued diligence on price and value. At the end of October performance is ahead of plan and the first half is expected to be significantly ahead of the previous year," he said.

Managing Director John Grant commented that current forecasts for November and December while early and subject to many variables, predicted first half net profit before tax would most likely finish in the range of \$10 million to \$11 million, up approximately 50% to 60% on the previous corresponding period.

"This is a great position to be in however we would caution shareholders against projecting these results into the full year. We have seen some shift in seasonality toward the first half and we will be incurring a range of occupancy and people related expenses in the second half which are not in the first half. We will advise shareholders should things change materially and will provide more details at the half year," he said.
