

## Data#3 performance continues to strengthen

**FY15 NPAT expected to be between \$10 and \$11 million, compared to the previous year's \$7.5 million**

**BRISBANE, Wednesday 22 July 2015:** Australian business technology solutions leader Data#3 Limited (ASX: DTL) has confirmed that, subject to audit, the net profit after tax (NPAT) for the 2015 financial year (FY15) is expected to be in the \$10 to \$11 million range, representing growth of approximately 35 to 45% compared to FY14's NPAT of \$7.5 million.

This pre-audit estimate represents solid growth in the core Data#3 business, together with contributions from the acquisitions and investments made in the year.

"We are delighted to see the continuing strengthening in our performance in what remains a highly competitive market, and a particularly strong fourth quarter has allowed us to deliver a very solid full year result," commented Data#3 CEO, Laurence Baynham.

Chairman Richard Anderson added that "Cash flow in the 2015 financial year remained very strong, further strengthening the balance sheet. Subject to final audit we expect to maintain the dividend payout ratio in line with previous years."

The board intends to announce the audited full year results and the final dividend on 20 August 2015.
