Data#3 wins competitive tender to provide PanAust with outsourced managed services

December, 06, 2017; Brisbane, Australia: Data#3 has been successful with a second-generation competitive tender for outsourced managed services to support PanAust Limited ('PanAust'), an Australian-headquartered copper and gold producer in Laos with pre-development and exploration opportunities in Laos, Papua New Guinea and Myanmar.

Data#3 Chief Executive Officer and Managing Director, Laurence Baynham, said the five-year contract was testament to Data#3's continued commitment to, and delivery of, best-practice technology services and solutions in support of PanAust's ongoing success, stability and long-term growth plans.

The service will provide secure and efficient technology services in diverse environments such as Laos, Myanmar and Papua New Guinea, in addition to PanAust's head office in Brisbane.

Commencing this month, Data#3's comprehensive managed services will provide:

- enhanced user services,
- improved service levels,
- expanded cybersecurity,
- more cost-effective asset management,
- expanded database support across Laotian mining operations, and
- broadened desktop support.

Data#3 won the competitive tender against a number of top global technology providers.

"The key to our combined success has been and always will be mutual trust, expertise and professionalism. We look forward to continuing our work with PanAust," commented Baynham.

Data#3 Service Delivery Manager, Adam Woolley, leads the team collaborating with PanAust.

"Our drive is to continue to provide the best services into remote locations with a focus on improving local services to optimise technology outcomes. As a result, PanAust can place its focus on delivering its strategic initiatives," said Woolley.
