Data#3 and Tenable Collaborate to Deliver Enhanced Cybersecurity Services to Customers

March 21, 2018; Brisbane, Australia: Leading Australian information technology provider, Data#3, today announced it has signed a partner agreement with [Tenable@, Inc.](#), the Cyber Exposure company.

With the rise of public cloud deployments, IoT, mobile and container technology, cybercriminals have more entry points than ever to launch an attack. This elastic attack surface has created a massive gap in an organisation's ability to truly understand its Cyber Exposure at any given time.

The combination of Tenable solutions and expertise will provide extended security options to Data#3 customers, helping them to detect vulnerabilities and threats, and gain visibility into any asset on any computing platform.

"Cybercrime is a growing concern for Australian companies today," said Richard Dornhart, National Security Practice Manager, Data#3. "As we continue to evolve our Security Practice to ensure that environments are protected, the collaboration with Tenable will expand our growing security services portfolio. I look forward to working with the Tenable team to help customers solve their complex security challenges."

The award-winning Data#3 Security Practice has gone from strength to strength since its launch in 2015. The new, strategic agreement with Tenable extends Data#3's security offerings and further enables customers to protect themselves from emerging threats.

"We are excited to work with Data#3 on our joint vision to help the Australian market more effectively manage their Cyber Exposure," said Bede Hackney, ANZ Country Manager, Tenable. "This partnership will allow Data#3's customers to benefit from our portfolio of solutions which empowers organisations to accurately understand, represent and ultimately reduce their cyber risk in the face of the rapidly changing modern attack surface."

"The timing of this partnership is ideal for Australian businesses that are now grappling with the mandatory data breach notification legislation which took effect last month. We look forward to the impact Tenable and Data#3 will have in supporting complex security requirements and building market momentum for both companies."

Through the [Tenable Assure™ Partner Program](#), Data#3 will offer the industry's first Cyber Exposure platform to its customers.
