

## Data#3 moves to a new digital and collaborative workspace in Perth's CBD

**May 31, 2018; Perth, Australia:** Leading Australian technology services and solutions provider, Data#3, today announced it has opened its new office in Perth. The company marked the occasion with a launch party, which was hosted by the Data#3 Board, and welcomed customers, vendors and staff.

Located in the heart of Perth on Mounts Bay Road, the new state-of-the-art facility places Data#3 at the forefront of digital innovation, allowing Data#3 staff to better serve its customers and technology partners. The office also features a unique collaboration space, facilitating ongoing customer and vendor partnership.

The company celebrated its 10-year Anniversary in Perth last November, following the national company announcement of 40 years in business and 20 years listed on the ASX.

Despite the recent challenging market, Data#3's Perth office has experienced substantial revenue and growth, which was the catalyst for the move.

"It's been a fantastic year of milestones for us at Data#3," commented Laurence Baynham, Data#3 Chief Executive Officer and Managing Director.

"In 2008, we commenced business in Perth with only four employees, and focused on selling software. Ten years later, we have a team of 80, with further expansion planned, and provide a full portfolio of solutions and services to our growing number of WA customers."

Data#3 General Manager for Western Australia, Kingsley McGarrigle, said, "This move aligns closely with our corporate and local strategic objectives. We've recently invested in senior leadership locally, and will continue to attract local top talent to work with our customers and help them to achieve their business and technology goals. This is an exciting time for Data#3 in WA, and we look forward to continuing to work with our customers and technology partners into FY19 and beyond."

Leveraging world-leading vendor technologies, Data#3 delivers an integrated array of solutions spanning cloud, mobility, security, data & analytics and IT lifecycle management. These technology solutions are delivered by combining Data#3's services across consulting, procurement, project services, resourcing and managed services.
