Data#3 expands Canberra office to align with growing customer demand

March 01, 2019; Canberra, Australia: Leading Australian technology services and solutions provider, Data#3, today announced that it has expanded its Canberra-based office to cater for growing customer demand in the ACT.

To meet the growth in the ACT, Data#3 has both increased the number of staff, and the depth and breadth of capabilities it is making available locally. This further investment will help to better-serve customers, meeting their growing need to enable their transformation initiatives using technology.

The announcement was made on Thursday at Data#3's Canberra office, where a gathering of staff and key vendor partners took place. Hosted by Data#3 Chief Executive Officer and Managing Director, Laurence Baynham, and General Manager for the region, Paul Crouch, both addressed the audience.

"I'm delighted to be here today to mark partnership and growth," said Baynham. "Our purpose is to enable customers' success. Now more than ever, digital transformation is driving the need for transformative technologies and the services that enable and support it in the ACT. I look forward to our continued growth supported by the strength and relevance of our solutions in the Canberra market as well as strong local and national partnerships with the global leading vendors."

Commenting on the local success, Crouch said, "Data#3's business in the ACT is growing through a combination of our own expanded capabilities, as well as the continued strengthening of our local partner engagement. Customers in Canberra have always appreciated our local presence, and many have said they are pleased to see our local team expanding. It's a journey we are very happy to continue and accelerate. I'd like to take this opportunity to thank our staff and vendor partners for their hard work and ongoing support."

ENDS

About Data#3

Leading Australian IT services and solutions provider, Data#3 Limited (DTL), is focused on helping customers solve complex business challenges using innovative technology solutions.
