

Data#3 Achieves Global Recognition as the Leader in Enterprise Networking

November 06, 2019; Brisbane, Australia: Leading Australian technology services and solutions provider, Data#3, today announced that it has been named the Enterprise Networking Partner of the Year at Cisco Partner Summit, which took place in Las Vegas this week.

The award recognises Data#3 as the global leader in Cisco's largest market segment and was presented to Data#3 for its customer-focused approach, which helps customers achieve their business outcomes and maximise the return on investment from their Cisco networking technologies.

Data#3 Group Practice Manager, Graham Robinson, commented, "I'm very proud to receive this award in a global forum. Software-defined networking is key to supporting our customers' digital transformation. The core focus of our Cisco practice is to leverage software to automate network processes, which aligns closely to Cisco's overall strategy. Together we are helping our customers optimise their networks to achieve their business and technology objectives."

Data#3 Chief Executive Officer and Managing Director, Laurence Baynham, commented, "What a fantastic achievement to receive global recognition for our efforts. The network is one of the foundational layers for digital transformation and is key for supporting our customer's investments in emerging technologies. We've experienced significant business growth due to our deep alignment with Cisco's growth strategy."

Over the past number of years, Data#3 has placed significant importance on customer experience, creating a team which helps customers maximise the return on their technology investment. This award follows on from last year's recognition as the global leader in Cisco software.

The company has also achieved Cisco's Gold Partner status, Cisco's highest partner certification. By leveraging Cisco's portfolio of software and hardware solutions combined with Data#3's services capability, Data#3 designs and implements enterprise networks that brings significant efficiency and productivity benefits to businesses.
