

Cisco Webex Teams vs Zoom vs Microsoft Teams

Compare collaboration platforms to find the best fit for your organisation

To help you make the right decision for your organisation's needs, we've lined up all the business-critical features of three leading platforms – Cisco Webex Teams, Zoom and Microsoft Teams – so you can easily compare.

 CISCO WEBEX TEAMS	 ZOOM	 MICROSOFT TEAMS
---	---	---

MEETINGS

 PARTICIPANTS	<p>Caters for up to 200 users. Start or join impromptu meetings with individuals or a group.</p>	<p>Up to 100 participants by default, with the ability to upgrade to 1000 participants.</p> 	<p>Maximum limit of 300 participants in each meeting.</p>
 VIDEO CONFERENCING	<p>Switch between three different video views and see up to 25 participants at the same time.</p>	<p>Up to 49 participants can be viewed at once via in-screen video.</p>	<p>View up to 49 people on a call or use virtual viewing modes to mimic in-person gatherings.</p> 
 MEETING COLLABORATION	<p>Brainstorm with participants via whiteboarding or screensharing with annotations. Share files and messages with in-meeting chat.</p>	<p>Uses an in-meeting whiteboard and allows multiple users to share screens at once. Send group or individual messages in chat, with guests able to “raise their hands” for questions.</p>	<p>Users can ink simultaneously on virtual whiteboards, or use a content camera to view in-room whiteboards. Connect through chat with a variety of personalised options.</p> 
 RECORDING	<p>Recorded meetings can be accessed via a link that appears in the Webex Teams space after the meeting ends.</p> 	<p>Paid subscribers can record meetings and save the video, audio and chat text.</p> 	<p>Record, process and access meetings on-demand from Stream in the cloud.</p> 

COLLABORATION

 CALLING	<p>Native in-app VoIP capabilities with HD voice and video calling for desktop and mobile.</p>	<p>Consolidated phone system with the ability to move Zoom phone calls to Zoom video meetings.</p>	<p>Interface enhancements with speed dial, contacts, history, voicemail and a dial pad accessible via one screen.</p> 
 INSTANT MESSAGING	<p>Join persistent chat rooms to participate, catch-up and follow along with team conversations.</p> 	<p>No persistent chat capabilities.</p>	<p>Users can leave and return at any time, with the full chat history available to them.</p> 
 FILE SHARING	<p>Quick and easy file sharing that's neatly organised, searchable, and saved alongside all your communication.</p>	<p>Share your screen and files during meetings only.</p>	<p>Securely access, share, and collaborate on files from anywhere with built-in access to SharePoint, OneDrive and OneNote.</p> 
CONNECTIVITY 	<p>Extend functionality of the platform by connecting your PC, Mac, iOS or Android device to a communal Webex Board or Room Kit.</p> 	<p>Connect to conference rooms systems and run or join video meetings.</p>	<p>Pair with the Surface Hub or existing audio-visual assets to transform the meeting room experience.</p> 

SECURITY

 ENCRYPTION	<p>End-to-end encryption of all messages, files and whiteboard drawings. For added control, manage your own encryption keys on-premises.</p> 	<p>Recently released an end-to-end-encrypted meeting option.</p>	<p>Data is encrypted in transit, at every stage of the data journey, and at rest via SharePoint.</p> 
 SECURITY POLICIES	<p>Determine who has access to spaces, and can delete files and messages. Configurable to require passwords that match corporate standards.</p> 	<p>After a history of lax privacy, the platform now offers password protection and 2-factor authentication.</p>	<p>Built-in security features and customisation options allowing end-users to set and enforce security protocols.</p>
