Microsoft Threat Protection Workshop

Learn how to put next-generation Microsoft security tools to work for you.

Workshop highlights

Identify real threats to your cloud environment with Threat Check

Understand your security goals and objectives

Deliver the end-to-end Microsoft security story

Showcase security scenarios with product demos

Develop joint plans and next steps

"The Threat Protection Security Workshop helped us understand our maturity levels on different sectors of cybersecurity."

- Harri Kivimaa, Head of End User Services, VTT

Do you know how many phishing attacks your organisation has received? If employees are using the right password protocol? Whether personal data is being exposed? In short, is your organisation's cloud environment as secure as you think it is?

Improve your security posture with a Microsoft Threat Protection Workshop

Organisations today are managing a growing volume of data and alerts while dealing with tight budgets and vulnerable legacy systems. Get help achieving your broader security objectives – and identify current and real threats – by scheduling a Microsoft Threat Protection Workshop.

We can help you develop a strategic plan customised for your organisation and based on the recommendations of Microsoft cybersecurity experts. You'll gain visibility into immediate threats across email, identity, and data, plus clarity and support on how to upgrade your security posture for the long term.

Why you should attend

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organisation is right now, and how to mitigate and protect against threats moving forward. By attending this workshop, you can:

Identify current, ongoing risks to your cloud environment	Walk away with actionable next steps based on your specific needs and objectives	Document your security strategy for the benefit of key stakeholders	Better understand how to accelerate your security journey using the latest tools

What to expect:

During this workshop, we'll partner with you to strengthen your organisation's approach to cybersecurity. We'll help you better understand how to prioritise and mitigate potential attacks, with:

- Deep analysis from Threat Check of cyberattack threats found targeting your organisation

- Actionable recommendations to help immediately mitigate the identified threats

- A detailed assessment of your IT and security priorities and initiatives, direct from cybersecurity pros

- An inside look at Microsoft's holistic approach to security, and how it relates to your organisation

- Demonstrations of integrated security, including the latest tools and methods

- Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps

Pre-Engagement Call	Kick-off Meeting	Cloud Discovery Log Collection	Threat Exploration	Threat Results Presentation	Engagement Decommissioning

Who should attend

The workshop is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Data Protection Officer

- Data Governance Officer
- IT Security, IT Compliance, and/or IT Operations
- Data Governance

Why Data#3?

When it comes to cybersecurity, you need an experienced partner. We are Microsoft's largest Australian business partner with the highest certified level of competency across the Microsoft ecosystem. Our hundreds of accredited consultants are ready to help. From enhancing productivity and collaboration with Microsoft 365, Meeting Rooms, and the latest Surface devices, to transforming business processes with Dynamics 365, and getting the most value from Azure cloud, Data#3 has you covered.
