

Cloud Security Envisioning Workshop

See and secure your cloud, uncover risks, protect assets, strengthen posture.

Do you have a good understanding of security vulnerabilities in your multi-cloud environment including VMs, databases, Microsoft Azure storage and more? Are you aware of the number of suspected authentication activities across your Azure and multi-cloud environment? How confident are you about the cloud security posture of your organisation?

Improve your security posture with a Cloud Security Envisioning Workshop

As the use of cloud services continues to grow, cyber risks and threats continue to evolve. Get help achieving your Azure and multi-cloud security objectives, and identify current and real threats, by scheduling a Cloud Security Envisioning Workshop.

We can help you develop a strategic plan customised for your organisation and based on the recommendations of Microsoft experts in security. You'll gain visibility into immediate threats and vulnerabilities across Azure and multi-cloud environments, plus clarity and support on how to improve your security posture for the long term.

Engagement highlights

Review your security goals and objectives

Identify real threats and discover vulnerabilities in your cloud environment

Map identified threats and vulnerabilities to specific solution recommendations

Develop plans and next steps

Why you should attend

Given the volume and complexity of identities, data, applications, devices, and infrastructure, it's essential to learn how secure your organisation is right now, and how to mitigate and protect against threats moving forward. In this workshop you'll:

Identify current, ongoing security threats and discover vulnerabilities in your cloud environment.

Document your security strategy for the benefit of key stakeholders.

Better understand how to accelerate your security journey using the latest Microsoft Security tools.

Walk away with actionable next steps based on your specific needs and objectives.

Cloud Security Envisioning Workshop

See and secure your cloud, uncover risks, protect assets, strengthen posture.

What to expect

During this engagement, we'll partner with you to strengthen your organisation's approach to cyber security. We'll help you better understand how to prioritise and mitigate potential attacks, with:

- ✓ Analysis of cyber security threats that are found targeting your organisation.
- ✓ Actionable recommendations to help immediately mitigate the identified threats and discovered vulnerabilities.
- ✓ Visibility into vulnerabilities to your Azure and multi-cloud environments to better understand, prioritise and address vulnerabilities and misconfigurations across your organisation.
- ✓ Long-term recommendations from Microsoft experts about your security strategy, with key initiatives and tactical next steps.
- ✓ Modular approach, allowing you to select three (3) out of seven (7) available modules aligned to your needs and requirements.

Cloud solutions evaluated

Defender for Servers

Defender for Databases

Defender for Storage

Defender for Containers

Defender for App service

Defender for AI Services

Security Exposure Management

Who should attend

The engagement is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- IT Security Architects
- IT Security Administrators
- IT Security Operations (Sec Ops)

Why Data#3?

Data#3 delivers unmatched expertise in securing your cloud environment across the Microsoft ecosystem. As Microsoft's largest Australian business partner, we help organisations protect critical assets in the cloud with advanced security solutions.

With a deep understanding of both security and licensing, we provide actionable insights to enhance your security posture, uncover risks, optimise your Microsoft investment and strengthen your overall Microsoft Azure and multi-cloud environments.

Speak to a Data#3 Microsoft Cloud Security Specialist today and take control of your cloud security.
