

The Data Security Envisioning Workshop

Identify data security risks in your organisational data

80% of leaders cited leakage of sensitive data as their main concern around adopting Generative AI

Data is the lifeblood of any business, and its security is paramount. As the datasphere is projected to double by 2026, the sheer volume and complexity of data will only increase, making it a prime target for security incidents. With the rapid deployment of generative AI apps, data security risks are escalating, demanding robust protection and governance. Yet, an alarming 30% of decision-makers lack visibility into their sensitive data's location or nature, leaving their digital estate vulnerable. It's time to take control and safeguard your business's future. Don't wait for a costly data breach to realise the importance of data security. Secure your data now and stay ahead in the game of digital defence.

Intelligently investigate and take action on data security risks

Detecting, investigating, and acting on data security risks in your organisation is critical to ensuring trust, creating a safe workplace and protecting company assets and employee and customer privacy.

The Data Security Envisioning Workshop gives you the insights you need to understand data security, privacy and compliance risks in your organisation.

Partner-led workshop highlights

-  Understand the risks of Dark organisational data
-  Learn about the risks organisational insiders may impose
-  Assess your environment against key data protection standards

Receive an analysis and report on findings and associated risks

Learn about tools and services that can help mitigate risks

Explore recommendations and next steps

As your business-critical data expands and generative AI is being deployed rapidly, having an integrated approach that can help quickly identify, triage, and act on data security risks is more important than ever.

By participating in this workshop, our experts will help you:

- Document your objectives and strategy around data security, privacy and compliance.
- Show how to detect, investigate and take action on data security and privacy risks.
- Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies.
- Provide actionable next steps based on your needs and objectives.

The Data Security Envisioning Workshop

Identify data security risks in your organisational data

The data security check uncovers risks that might be harmful to your organisation

The data security check is an integral part of the Data Security Envisioning Workshop. The data security check leverages Microsoft Purview tools and services in an automated process to:

- Discover data that is stored in the Microsoft 365 Cloud and analyse it for the presence of artifacts that may impose data security risks to the organisation.
- Analyse user behavior for events that impose a risk to the customer’s organisation. These vulnerabilities range from the loss of intellectual property to workplace harassment and interaction with generative AI applications

The data security check is structured around typical Microsoft 365 services and their associated data repositories that organisations use. At its core, the data security check analyses user behavior and scans data repositories related to email, collaboration, and document storage.

Optional modules can be added to extend the data security check to include on-premises data repositories, Windows 10/11 endpoints, generative AI and more. All activities share a common framework that will allow you to understand the risks that exist in your organisation and develop a roadmap to mitigate and protect your company’s information.

The Data Security Envisioning Workshop

Identify data security risks in your organisational data

What to expect

By the end of this workshop, experts in Microsoft compliance will provide you with a:

- ✓ Security check report that includes findings and insights from the automated discovery process.
- ✓ List of recommendations and actionable next steps that will help mitigate the identified risks.
- ✓ Clear look into Microsoft's approach to data security and mitigating and controlling insider risks.
- ✓ Optional Compliance Manager Tenant Assessment report with suggestions and top key improvement actions.
- ✓ Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps.

Why Data#3?

With a deep understanding of both security and Microsoft 365 environment, Data#3 ensures you gain the full value of your Microsoft investment helping you reduce risk, simplify compliance and protect sensitive information across your digital environment.

By partnering with Data#3, organisations benefit from trusted Microsoft expertise that translates complex security capabilities into a clear, actionable roadmap to safeguard critical and sensitive data.
